PROJECTS

FreeWork— Hackathon Project @ IIT Roorkee (48hrs)
Group Project

- Led and handled the majority of backend development, including user authentication, job & proposal APIs, and secure payment integration.
- Collaborated closely with frontend teammate for seamless integration and final demo.

One Finance— *Group Project*

- Built a personal financial dashboard app in 24 hours for a hackathon, enabling users to view detailed bank account information.
- Handled backend development, including API server and database, ensuring smooth and efficient functionality.

WanderLust (Airbnb Clone)— *Self Project*

- Developed a fully functional clone of Airbnb, featuring a backend built with Node.js and Express, and a MongoDB database.
- Implemented user authentication, password hashing, reviews, and comments. Integrated Mapbox API for dynamic map features and theme customization.
